

1/13/2022

Good afternoon, welcome to Tech Tip Thursday (What's New with Chrome and Chromebooks)

Google continually releases updates and features to Chrome and Chromebooks. To keep up with the latest, please use the links below which outlines the new features in Chrome and Chromebooks. Each of the headings is a link to instructions on how to utilize the new features.

Joe

[What's New with Chromebook?](#)

Chromebooks update automatically to provide you with the latest features and keep the software fresh and speedy. Here are some highlights from recent updates.

[Scan documents using your camera](#)

You can now scan documents with your Chromebook camera. The camera automatically identifies, captures, and crops your documents, then you can save them as a PDF or a picture. Just open your Chromebook's Camera app and press the "Scan" button to get started.

[Natural voices for Select-to-speak](#)

You might already use Select-to-speak to hear text read out loud on Chromebooks. Now you can choose from a range of more natural-sounding voices that help spoken text be more fluid and easier to understand. These are helpful for people with dyslexia, low vision, or other print disabilities. Select your preferred voice in accessibility settings.

[Easily organize your browser tabs into desks](#)

It's now easier to see which Chrome browser windows are in the same virtual desk, and move tabs between windows to the right place on the first try. Just right-click on your browser tab, select "Move tab to another window", and you'll see your windows grouped by which virtual desk they are in.
